Mrs. Ch. Anitha

Asst. Professor, CS&IT

Hyderabad-500090, Telangana, India.

ABSTRACT

Campus Career Hub is an intelligent web-based platform that integrates academic learning and career development into a single, centralized system. Students often depend on multiple platforms to access study materials, upload projects, prepare resumes, and search for internships or jobs, making the process fragmented and inefficient. This platform addresses these challenges by providing a unified solution for both academic and professional growth. It includes a Smart Notes Search Engine that allows users to search notes, previous year question papers, assignments, and lecture materials using keywords while identifying the exact page containing relevant information. The platform also features a Resume Analyzer that evaluates resumes, identifies missing skills, and provides ATS compatibility scores.

A Job and Internship Matching module compares student skills with job requirements to recommend the most suitable opportunities. Additionally, students can showcase their projects, portfolios, and GitHub repositories, enabling recruiters and faculty to evaluate their work. The system employs efficient Data Structures and Algorithms such as Tries, Hash Tables, Inverted Indexing, Graphs, Priority Queues, and Pattern Matching to deliver fast searching, intelligent recommendations, and optimized data retrieval. Developed using React, FastAPI, and PostgreSQL, Campus Career Hub provides a scalable, secure, and user-friendly platform that enhances academic performance, improves career readiness, and simplifies the transition from education to employment.
